For more than 30 years, the GIE Defence NBC brings together innovative PME's, subsidiaries of large groups and research laboratories from the French NRBC Defence industrial base that contribute to the excellence of operational responses in an area of national sovereignty.

Moreover, the evolution of the threat (the military aggression, the terrorism or the industrial accident), the evolution of the nature of the aggression (nuclear, radiological, biological or chemical) and the respect of the environment are a permanent concern of the group with associates over time new skills to offer adapted solutions.

Privilege are these strong links with french authorities for the knowledge of the operational context and its fields of expertise and products in the CBRN field, GIE NBC promotes, internationally, the control of the security forces, the populations and territories, and creates a fertile context for the development of its member companies for export.
